Color Position Lights

CPL located at Ridge Road Wye top marker indicates switch is lined for Main 1 bottom marker indicates switch is lined for Main 2.

Tall Mast Signals

Deer Ridge Tunnel Main 2 head inside tunnel flashing yellow indicates yard switch is lined for yard tracks.

Signal heads at Woodsvally Wye and at Arborway signal bridge, FLASHING RED indicates that one or more of the crossover switches is not lined for normal flow of traffic.

Radio Communication

The engineer will ALWAYS answer and respond to any radio communication having to do with the movement or operation of the train.

The conductor will answer calls for locations and call out set location on the railroad

- a. Departing Woodsvally Station
- b. Woodsvally Wye downhill and uphill
- c. Panhandle Junction downhill and uphill
- d. Merrimac Station downhill and uphill

If train is stopped on the main and the conductor is having trouble with communication with the engineer conductor may switch to Channel 2 for direct talk to engineer with the engineer always remaining on Channel 1.
